RETURN AUTHORIZATION FORM
(FOR RETURN OF DUPONT EMPTY CYLINDERS, DEFECTIVE or FULL PRODUCT CONTAINERS)

IMPORTANT FOR ALL RETURNS: RA# MUST BE INCLUDED ON ALL SHIPPING DOCUMENTS

Empty Cylinder Returns

- Minimum empty cylinder return requirements include either 12 empty 125-lb. and/or one empty half-ton cylinder.
- Palletize horizontally for a maximum of 12 cylinders (96-lb. and 125-lb.) per pallet. Use scalloped separators for 3 layers of 4 cylinders each. Double-band the cylinders to the pallet at both the front and the rear of each pallet.
- Specialty containers e.g., 10 or 24-lb. water capacity, should be consolidated and returned on a separate pallet--no minimum requirement per pallet. These are to be shipped with other return containers.
- Half-tons must be shipped upright, and ton tanks must be shipped horizontally with valve protection cover in place, parallel to the end of the truck using required blocking and bracing practices as outlined in DOT 49CFR, Part 177. **Assure valves are closed.**
- Empty Cylinders Return for Deposit Policy details can be found in the customer only area of our website at www.refrigerants.dupont.com. Acceptable shipments must contain less than 25% non-DuPont cylinders.

Defective (Leakers/Damaged) and Full Product Returns

- Flammable material (Dymel® A, Dymel® 152A, and Formacel® Z-2) must be palletized and banded vertically for a maximum of 16 cylinders (70-lb. and 95-lb.) per pallet. Use scalloped separators to secure cylinders in vertical position. Consolidate and ship with return containers. If cylinder is totally empty, it's acceptable to ship horizontally (see guidelines above).
